

## Driveway Culverts

### Emergency Repair & Disaster Recovery

**Maintenance & Replacement of Culverts is the Responsibility of the Landowner.** As stated in the Town's driveway permit application: "The maintenance of private driveways and culverts is to be and remains forever the responsibility of the driveway owner, per State Statutes. Once installed, it is the owner's responsibility to keep the driveway and culvert free of snow and debris and keep it accessible at all times."

**Exception for Emergency Repairs and Disaster Recovery.** Due to time constraints associated with emergency repairs, the Town will replace driveway culverts which are undersized and/or damaged beyond repair as needed at Town expense during the course of the emergency repairs and disaster recovery. Once the culvert is installed, the maintenance and replacement of the culvert will be the responsibility of driveway owner.

*The Town Road Foreman's assessment the sizing and condition of the culvert is final and not subject to appeal.*
