Project Update – Killington Access Road Phase 1B

Date: 6/7/2024

Work for the week of 6/10/2024

Expect drilling and blasting this entire week. There will be one blast daily. We aim to blast between 11 AM and 12 noon, but if there is any unforeseen delays it could be as late as 1PM. We are continuing to haul blasted rock off site. Trucks will be entering and exiting from Route 4 to haul away the rock. Please be aware of trucks entering and exiting.

Although the second drill rig was supposed to arrive last week, it will be on site either Monday or Tuesday. Expect delivery of the drill and another delivery of blasting mats to arrive either of these days. They will start drilling down near Route 4, then work up the east side of the access road to remove remaining ledge. Due to timing, there may be multiple blasts per day if it lines up. Traffic will be stopped for those shots, so be aware of flaggers on the road to stop vehicles for 5-10 minutes.

Work will continue to install the sewer structures and pipe along Route 4. We will then focus the second half of the week on installing water and sewer line away from Route 4 south on the Access Road. As this progresses, expect more sand and gravels to be installed to build up the road base.

Work for the week of 6/17/2024

Work for the following week will be a continuation of drilling and blasting rock. Dump trucks will be entering and exiting the site to load out this rock. This will continue through the week.

Sewer line installation will continue this week as well. This will be installed up the east side of the Access Road where the second drill rig will be working. In addition, we will be also working to install the future water line along the west side of the Access Road. Again, as these two lines are installed, we will continue to install the sand and gravel layers which will be just below final pavement layer.

A continuation of dust control will be happening as we get into warmer and drier weather, so continue to be aware of the water truck entering and exiting from the job site

In addition, work to haul out rock will occur on Saturdays till about noon time. Please be cautious of trucks entering and exiting on Saturdays going forward

Thank-you,
